Re: Himco Landfill

RECEIVED

Dear Ms. Swales,

In response to subject letter, Elkhart Machine & Tool, Inc. is a manufacturer of small toolings, and special machines. We also do production machining of forgings and castings, to customer specifications. Our manufacturing process is basically machining of steel and the assembling of it into dies, fixtures, gages, jigs, etc..

The waste generated from this process is scrap steel and aluminum shavings. These shavings are sold as scrap steel to Sturgis Iron & Metal.

Himco Waste Away is contracted to dispose of our office waste, which consists of trash related to our office procedures, and also any scrap steel which is too small to save. There are occasionally small pieces of wood put into the Himco dumpster.

All of our hazardous material, which mainly consists of machine coolants and lubricants are disposed of by Berreth Oil, who is also the supplier of our coolants and lubricants. The individual responsible for making the arrangements for the disposal of our hazardous material is Mr. Stephen Estes, in conjunction with the shop foreman and the purchasing agent.

If you have any questions or need any further information, please do not hesitate to call Anne Marie Hasty at (219)264-9561.

Sincerely,

A handwritten signature in cursive script, reading "Anne M. Hasty".

Anne Marie Hasty
